

使用 Endnote 在 Office Word 中插入文献的方法

1. pubmed 查找文献

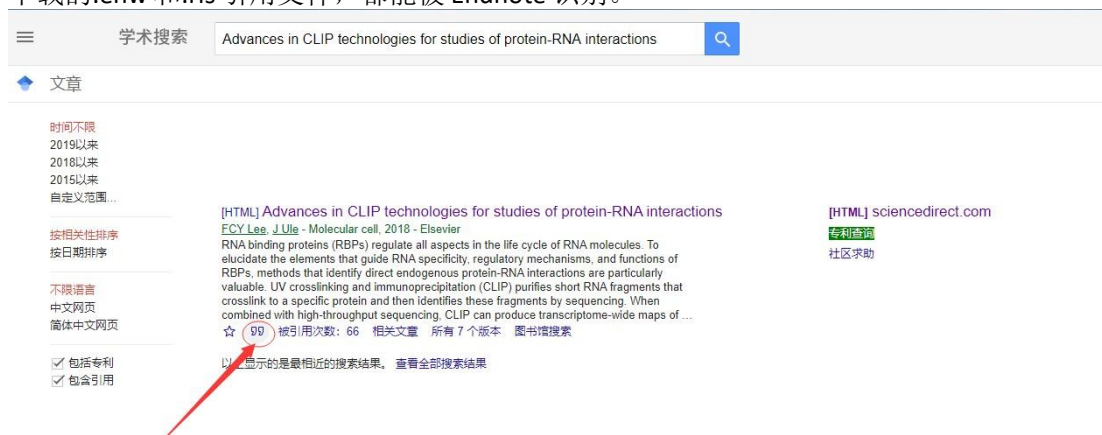

如果提供的是 PubmedID 或者 doi 号，直接输入即可搜到相应文献；

如果提供的是作者和年份，或许需要输入：作者，年份，1-2 个关键词，才能搜到相应文献。

2. 找文献的引用文件

以《*Advances in CLIP technologies for studies of protein-RNA interactions*》文献为例，先在谷歌学术、百度学术、Pubmed、NCBI、Sciencedirect 上面找到 Endnote 能用的引用文件。一般来说，引用文件的只要能被 Endnote 识别，就能导入到 Endnote 里面。比如这边下载的.enw 和.ris 引用文件，都能被 Endnote 识别。

[HTML] Advances in CLIP technologies for studies of protein-RNA interactions
FCY Lee, J Ule - Molecular cell, 2018 - Elsevier
RNA binding proteins (RBPs) regulate all aspects in the life cycle of RNA molecules. To elucidate the elements that guide RNA specificity, regulatory mechanisms, and functions of RBPs, methods that identify direct endogenous protein-RNA interactions are particularly valuable. UV crosslinking and immunoprecipitation (CLIP) purifies short RNA fragments that crosslink to a specific protein and then identifies these fragments by sequencing. When combined with high-throughput sequencing, CLIP can produce transcriptome-wide maps of protein-RNA interactions. This review summarizes the principles and applications of CLIP technologies for studies of protein-RNA interactions. *Molecular cell* 69(3) (2018): 354-369.

Citing article

The screenshot shows the ScienceDirect article page for "Advances in CLIP Protein-RNA Interactions". The article is a Technology Review by Flora C.Y. Lee and Jernej Ule. The page includes a sidebar with navigation links (Outline, Summary, Main Text, Acknowledgments, Supplemental information, References, Show full outline), a list of figures (1), tables (2), and extras (1). The main content area displays the article title, authors, DOI, and a summary. The summary text describes the CLIP method and its applications. A red arrow points to the "Export" button in the top right corner, which opens a dropdown menu with options: "Save to Mendeley", "Save to Refworks", "Export citation to RIS", "Export citation to BibTeX", and "Export citation to text". Another red arrow points to the "Export citation to RIS" option. A third red arrow points to the browser address bar at the bottom, which shows the URL "S1097276518300.....ris" and the domain "scholar.enw".

3. 引用文件存入 Endnote 的数据库

在电脑中找到下载的引用文件，双击引用文件打开、拖拽引用文件到 Endnote 软件界面、用 Endnote 中的导入命令都是可以打开的。在 My groups 这里一栏的空白处右击，新建一个组（Group）并将其命名，然后将这个引用文献移动到这个组里面。

4. 插入文献至 Word

主要分为三步：

- (1) 打开 Office Word 或者 Wps Word，注意低版本的 WPS Word 不支持 Endnote，建议使用 Office Word
- (2) 选择自己或编辑部需要的引用格式
- (3) 点击插入键，得到 Word 中的插入文献样式
- (4) 更改文献附标

此处可选择目标杂志:
